#### Explanation of Status Field

- **"Active"** means the service provider/designated agent information has been successfully registered or updated and is currently available in the public directory.
- **"In Process"** means you have begun to register a new service provider, but have not completed the process.
- **"Amendment Pending"** means you have begun to update information for a previously registered service provider, but have not completed the process.
- **"Payment Incomplete"** means you have begun the payment process through Pay.gov, but have not completed it.
- **"Payment Processing"** means you have submitted payment through Pay.gov, but your payment has not yet been verified. For credit cards, this process should take only a few minutes, but for payments made through ACH, it will take 7 days. Once payment has been verified by Pay.gov, this status will automatically change to "Active".
- **"Terminated"** means you have cancelled the service provider's designation or it has expired due to a failure to renew. Until such time as a new designation is made, the public directory will show that this designation was terminated and that the service provider no longer has an active designated agent listing in the directory.
