Disclosure of Conflicts of Interest

I have reviewed the American Brain Foundation's Policy on Conflicts of Interest. I understand that, as a Foundation official, I have a conflict of interest if I have a private interest that may interfere with my official responsibilities to the Foundation. Further, I understand that I must disclose a potential conflict of interest at the beginning of my term as a Foundation official, annually thereafter, and whenever a change in my personal circumstances causes the previously submitted disclosure form to be no longer correct.

In addition, when I am aware of a potential conflict of interest concerning an agenda item in a Foundation meeting, I will promptly disclose that conflict to the chair.

I declare the following potential conflicts of interest:

- Consultant for Frazer Ltd (manufactures Mobile Stroke Units)
- Grant support from Chiesi and CSL Behring (donate drugs for Mobile Stroke Unit)
- Grant support from Acticor (US PI for study of a GPVI inhibitor for acute ischemic stroke)
- Grant support from Patient Centered Outcomes Research Institute (PI of BEST-MSU trial to study Mobile Stroke Unit outcomes compared to standard management by EMS).
- Grant support from NIH-NINDS as Co-PI of two phase 3 trials. 1. to study add-on treatments to thrombolysis for acute ischemic stroke (MOST), and 2. to study a hemostatic agent to limit bleeding in patients with acute intracerebral hemorrhage (FASTEST).
- Scientific Advisory Board for Haemonetics (manufactures blood coagulation testing equipment for use on the Mobile Stroke Unit)
